

My Future is Durham – Video Transcript

I go to work on my magic bike, it drives itself.

I would like a catapult.

I parachute out of the plane into my office.

It would have outside swimming pools in lots of picnic spots.

The trees are going to be really big so there's going to be lots of shade so people don't get too hot.

Lots of space and it's just nice and calm.

There's lots of offices in it so you're not all alone.

Big open space with marble floors so you can slide across the floor.

I want a hologram projector to show people stuff in 3D.

If I have robots in my office I'll tell them to give me food.

Power the place by the core of the moon.

It would have loads of slides.

That's my perfect workplace.
