Following the successful HLF-funded Allen Valleys Landscape Partnership Scheme (completed in September 2018), the local organisations involved in the scheme have taken on management of a number of heritage assets and the development of several projects. A successful Resilient Heritage bid has allowed us to appoint a Project Development Officer, and allocate a budget, to support these organisations by helping them with investments in skills, advice, equipment and new systems. At the beginning of this new project we require a contractor to help us to analyse the community-heritage sector in the Allen Valleys and to make recommendations and provide support for change which will make this sector more resilient, and its constituent organisations more sustainable.
