

## Locarbo video transcript

[At the top left of the image a GaiaTV Municipio logo, followed by the text 'Projeto de cooperação interregional LOCARBO' are displayed.]

[Sound: Music with a heavy beat.]

[A logo for LOCARBO Interreg Europe is shown at the top left.]

[Text overlay on left-hand side 'A radical change in governance and consumers' behaviour is necessary' with the image of a telescope with a view of streets and buildings beyond on the right-hand side.]

[Overlay text: As the video is narrated, a series of overlays are shown , overlaying half of the image area. The overlay has a light green background and has text in white. Sometimes text is in black to highlight it.]

[Image of a thermostat with overlay text 'Novel roles of regional and LOcal authorities in supporting energy consumers' behaviour change towards a low CARBOn economy'. The text changes to highlight the letters 'LO' and 'CARBO' in black.]

[An image of a coast road with buildings on the left and the sea on the right is followed by a series of images from across the EU including ariel views of buildings, town and countryside with distant hills, a river, houses built on a cliff face, a waterfall and a multi storey building development site.]

[Sound: The sound level of the music is lowered and a lady starts speaking.]

[Image of a multi storey building development site with overlay text, ' EU buildings are responsible for 40% of energy consumption and 36% of CO2 emissions'.]

[Lady]

EU buildings are responsible for 40% of energy consumption and 36% of CO2 emissions.

[Image of a crane working and footage of the building development site with overlay text, '2/3 of energy consumption in buildings is used for heating and cooling'.]

[Lady]

The two thirds of energy consumption in buildings is used for heating and cooling.

These considerations in addition to a changing climate, whose effects are increasingly evident day by day, led us to say that it's time to act.

[Video clip of a townscape and footage from above a tall, multi-storey buildings with overlay text, 'It's time to act! ]

[Lady]

This means that the transition to a low carbon economy has become urgent and that the intervention in the building sector is crucial.

[Time lapse video clip showing work progressing on a construction site and with overlay text, 'The transition to a low carbon economy is urgent'. Followed by new overlay text 'The intervention in the building sector is crucial.']

[A series of video clips and images from across the EU including of bridges and waterways, town and countryside with distant hills, people socialising around a table, houses built on a cliff face and of mountains. The images are overlaid with the text, 'A radical change in governance and consumers' behaviour is necessary'.]

[Lady]

A radical change in governance and consumers' behaviour is necessary for supporting this radical transition to a low carbon economy.

Based on this consideration and necessities, seven different European actors merged together and outlined the LOCARBO initiative.

[Image of map of with LOCARBO Interreg Europe logo top left and each of the sectors indicated as an area of green on the map: UK, Portugal, Italy, Lithuania, Hungary and Romania.]

[Image of streets and buildings with text overlay, 'LOCARBO is an interregional cooperation project'. This is followed by new text overlays, of each of the three objectives spoken, overlaid as text onto a series of changing images.]

[Lady]

LOCARBO is an interregional cooperation project whose main objectives are:

- to improve policy instruments for increasing energy efficiency and the use of renewables in buildings.
- to find innovative ways for regional and local authorities for supporting energy consumers' behaviour change by enhancing motivation and awareness.
- and to promote more conscious consumers' decisions on energy efficiency through the use of smart technologies.

[Street scenes and local images with a text overlay, 'By 2020, each region will implement and monitor an action plan with stakeholders and the community.]

[Lady]

LOCARBO main expected achievement is that by 2020 each region involved in the project will implement and monitor a specific action plan built in close collaboration with this own network of stakeholders and local communities.

[Louder upbeat music with a quick succession of images are shown, finishing with an image of a thermostat and the logos for the seven partners: [shield logo], Regione Basilicata, Villa Nova De CAIM, Durham County Council, Kaunas university of technology, Mi6, [shield logo].

[Text overlay, 'Novel roles of regional and LOcal authorities in supporting energy consumers' behaviour change towards a low CARBOn economy'.]

[Ends]
